WHAT IS BAC WATER?

BAC Water (Bacteriostatic Water) is a sterile, non-pyrogenic water solution containing 0.9% benzyl alcohol as a preservative. It is commonly used in laboratory and research settings to reconstitute peptides and compounds for research purposes.

RESEARCH USES

BAC Water is intended for laboratory research use only. It is used to dissolve or dilute research peptides and compounds under controlled conditions. This product is not intended for diagnostic, therapeutic, or any human or veterinary use.

QUALITY & STERILITY

Manufactured in a cGMP-compliant facility and sterile filtered (0.22µm) to ensure high purity and consistency. Each batch is tested for sterility and quality to support reliable research results.

Note: Store in a cool, dark place. Keep tightly sealed when not in use.

PREMIUM RESEARCH QUALITY

Sourced with high standards for research-grade purity and consistency.

LABORATORY GRADE STERILITY

Sterile filtered and produced under cGMP-compliant conditions.

RESEARCH ONLY

For laboratory research use only. Not for human or veterinary use.

RESEARCH USE ONLY ★ NOT FOR HUMAN USE

NOT FDA-APPROVED. NO CLAIMS ARE MADE REGARDING THE SAFETY OR EFFICACY OF FREEDOM PEPTIDES RESEARCH PRODUCTS FOR DIAGNOSING, TREATING, CURING, OR PREVENTING ANY DISEASE.
